GSM Based Real Time Home security System

coolmirza143, Wed Jan 18 2012, 07:19 pm

  Home Security using GSM, this project secures your home and also creates a log of door activity mean open and close. It has four door sensors and if state of any door changes it will send a text on your cell. you can use these switches as per your requirements for example you can use a break beam detector instead of switch or can use PIR sensors too. So its up to you that what kind of security you need to implement. Here is a view of complete hardware

Here is Circuit Diagram

Author of this project is not sharing code with world   Sad but you can write it at your own we all are here to help you in this regard Make use of forum if you need any kind of help
